LIVESTOCK SLAUGHTER, MEAT AND LARD PRODUCTION, 1963

Total production of red meat during 1963, including commercial and farm slaughter, was 30,559 million pounds, up 6 percent from 1962, according to the Crop Reporting Board. Beef production in 1963 was 16,423 million pounds, 7 percent greater than the 1962 production of 15,296 million pounds. Veal production was 927 million pounds, 9 percent below the 1962 production of 1,015 million pounds. Pork production totalled 12,439 million pounds, up 5 percent from the 11,836 million pounds produced in 1962. Lamb and mutton production was 770 million pounds, 5 percent less than the 1962 production of 809 million pounds. Beef accounted for 54 percent of the total red meat production in 1963, pork 41 percent, veal 3 percent, and lamb and mutton 2 percent. Lard production amounted to 2,476 million pounds during 1963, compared with 2,480 million pounds a year earlier.

The total number of cattle slaughtered in 1963 was 4 percent above 1962. Federally inspected cattle slaughter was 7 percent more than a year earlier, but other commercial slaughter was down 3 percent. Farm cattle slaughter was up 1 percent. Total calf slaughter in 1963 was down 8 percent. The slaughter of calves decreased 9 percent in both Federally inspected plants and in other commercial plants, but farm slaughter increased 1 percent. The number of hogs slaughtered in 1963 was 4 percent greater than in 1962. Federally inspected slaughter increased 6 percent and other commercial slaughter was up 2 percent, but farm slaughter was down 7 percent from the previous year. The number of sheep and lambs slaughtered in 1963 decreased 6 percent from a year earlier. The number slaughtered under Federal inspection was 5 percent less, other commercial slaughter was down 13 percent, and farm slaughter was down 1 percent.

The average live weight of all cattle slaughtered during 1963 was 19 pounds heavier than a year earlier; calves averaged 2 pounds lighter; hogs averaged 1 pound lighter; and sheep and lambs averaged 1 pound heavier.

Slaughter in Federally inspected and other commercial plants is included in the monthly estimates. Farm slaughter estimates are on a quarterly basis only. The farm slaughter estimates have been revised for 1962.

The rank of States by number of head slaughtered for each species excludes farm slaughter numbers.

This report is made possible through the cooperative efforts of the Meat Inspection Division, Agricultural Research Service, and the Statistical Reporting Service.
